ONE ASEAN
ONE RESPONSE

Annual Report
2015
Introducing the New Identity of the AHA Centre

After four years of establishment, we have reassessed our logo through meticulous brand perception audit.

The previous AHA Centre logo was developed to project identity of a new organisation, while maintaining the ASEAN identity. In the new one, we still carry that identity but with several new elements:

The red colour in “AHA” depicts energy and passion, while black in “CENTRE” represents the formality of being the coordinating centre for humanitarian assistance on disaster management of ASEAN.

The ten half-circular shape represents the ten National Disaster Management Offices (NDMOs) in ASEAN.

The outer-bold-half-circle-shape represents the ASEAN Committee on Disaster Management as the founding fathers of the AHA Centre and also as the Governing Board of the AHA Centre.

Combined altogether, all elements create a unified identity for the vision of One ASEAN One Response.

As the new logo was endorsed at the 3rd Meeting of the Governing Board of the AHA Centre in Phnom Penh, Cambodia, December 2015, we are pleased from now on to incorporate the new logo as our new identity for the AHA Centre.

We hope the spirit of unity embodied in the new logo captures the solidarity and the collective effort of the ASEAN as we move toward the vision of One ASEAN One Response.

Thank you.

Said Faisal
Executive Director of the AHA Centre
ASEAN Coordinating Centre for Humanitarian Assistance on disaster management

</table>
It has been an honour for the Kingdom of Cambodia to be the Chair of the ASEAN Committee on Disaster Management (ACDM) in 2015 and to support disaster management efforts in ASEAN region.

In 2015, we have witnessed exciting progress towards the realisation of ‘One ASEAN One Response’ vision. From coordinating ASEAN Member States’ assistance during disaster emergency response missions to reaching out to wider groups of stakeholders through ‘One ASEAN One Response Roadshow’, training the future leaders of disaster management through the AHA Centre Executive Programme to the conduct of the feasibility study for the Disaster Emergency Logistics System of ASEAN Satellite Warehouse establishment, the AHA Centre have ensured us that those would culminate to ensure that the vision is embraced in all aspects of disaster management efforts in the region.

In 2015, the Kingdom of Cambodia hosted the 26th and 27th ACDM Meetings, back-to-back with the First and Second Meeting of the Governing Board of the AHA Centre. We congratulate the AHA Centre in its fourth year of anniversary on 17 November 2015. We are confident that the AHA Centre will continuously play its role as the engine to the ASEAAN Agreement of Disaster Management and Emergency Response (AADMER). It has been serving as the coordination and information hub for emergency response in times of disaster, managing and deploying ASEAN’s resources for collective response, developing the capacity of disaster management officers, and facilitating the coordination between disaster management actors in the region.

We are wishing for a continuing success to the AHA Centre. With the fifth year of its operationalisation approaching, and the AADMER Work Programme moves forward to beyond the 2010 – 2015 timeline, we are confident that we will see more progress happening.

We would like to extend our appreciation to ASEAN Dialogue Partners and partners which have been supporting the AHA Centre and disaster management efforts in the region. We also would like to welcome to Indonesia’s leadership in ACDM in 2016, and wish Brunei Darussalam the best for co-organising with the AHA Centre in the ASEAN Regional Disaster Emergency Response Simulation Exercise (ARIDEX) in 2016.

As we began our journey in 2015, the ASEAN community was reminded of the fact that our region remains as one of the most disaster-prone regions in the world, with the devastating floods happening in Malaysia. Given the widespread impact, the AHA Centre mobilised its team and relief items swiftly in coordination with Malaysian National Security Council.

2015 was the year where ASEAN solidarity being tested again. Numerous support coming from neighbouring countries helped and stand by the Government of Myanmar, when the devastating floods happening in August. Upon the coordination with Myanmar National Disaster Management Office, 2 AHA Centre personnel and 7 ASEAN Emergency Response and Assessment Team (ASEAN-ERAT) coming from various backgrounds and organisations in ASEAN were deployed to support the disaster management efforts in respect of the floods.

In late 2015, four AHA Centre team, and one local ASEAN-ERAT witnessed the unified solidarity and the persistence coming from the people of the Philippines during their deployment to Typhoon Koppu. At the same year in December, the AHA Centre team was also with the Government of the Philippines as they prepare emergency response to Typhoon Mario.

2015 is important for the AHA Centre, as the vision of ‘One ASEAN One Response’ is introduced to the ASEAN Member States. One ASEAN One Response is about Speed, Scale and Solidarity. Speed is how fast we can mobilise resources to the affected community, Scale is how big we can mobilise the resources and to consolidate them as an inclusive Solidarity. As part of our efforts on introducing this vision to the ASEAN Member States, we conducted the One ASEAN One Response roadshow started from April – December 2015 namely in Indonesia, followed by the Philippines, Thailand and Cambodia, with the aim to have it on all ASEAN Member States in the following years.

The AHA Centre continues to receive strategic guidance and direction from the ASEAN Member States through the ASEAN Committee on Disaster Management (ACDM) as well as the Governing Board of the AHA Centre. In 2015, the AHA Centre took part in the 26th – 27th ACDM Meeting as well as 2nd-3rd Meeting of the Governing Board of the AHA Centre and also the 3rd ASEAN Ministerial Meeting on Disaster Management and 4th Meeting of the Conference of Parties (COP) to AADMER Agreement on Disaster Management and Emergency Response (AADMER), under the leadership of Cambodia.

2015 is yet another important year for the AHA Centre where we signed a Memorandum of Intent (MoI) with the private sector, namely Corporate Citizen Foundation. It’s a Singapore-based consortium of private companies who pledge to actively provide assistance in times of disaster. On the same year, we also reiterated our commitment on being the regional coordinating centre for humanitarian assistance on disaster management in ASEAN by participating in one of the biggest disaster simulation exercises, the ASEAN Regional Forum Disaster Relief Exercise (WFP-ODEREX) 2015 held in Malaysia.

Meanwhile in 2015, the AHA Centre Executive (ACE) Programme, a six-month training programme managed by the AHA Centre, has generated its second batch of future leaders in disaster management in ASEAN, comprising sixteen officers from National Disaster Management Offices (NDMOs) in ASEAN. As of 2015, there are 22 graduates in total, since its first batch in 2014.

We believe the progress and achievements made by the AHA Centre since its establishment in 2011 continues to 2015 cannot be achieved without the support coming from the ASEAN Member States, ASEAN Secretariat, especially the Disaster Management and Humanitarian Assistance (DMHA) Division, Dialogue Partners – namely Australia, China, European Union, Japan, New Zealand, and USA as well as partner organisations which continued their support to the AHA Centre. Our greatest appreciation is also extended to Cambodia for its leadership in the ACDM and in the Governing Board of AHA Centre. We will be looking forward to progress further under the leadership of Indonesia as the next Chair of ACDM and Governing Board of the AHA Centre in 2016.

Thank you very much.
In 2015, the AHA Centre began with a mission to support emergency response efforts for flooding in Malaysia. Later, the AHA Centre also responded to three disasters in the region i.e. Myanmar Floods in August, Typhoon Koppu (Philippines) October and Typhoon Melor (Philippines) in December 2015.

In February, the AHA Centre launched The Column – monthly corporate newsletter which regularly reports its activities and provides insights as well as important information on disaster management-related issues. The AHA Centre also reinforced its operational system by reviewing and improving its Incident Command System (ICS). Major improvements also made to the ASEAN Disaster Monitoring and Response System (ASEAN-DMRS) – a disaster monitoring and analysis platform that supports the decision-making and planning process in the AHA Centre as well as the ASEAN Member States. Continuing its commitment to develop future leaders in disaster management, the AHA Centre organized the second batch of the AHA Centre Executive (ACE) Programme with sixteen disaster management officers accomplishing the six-months training in August 2015. As of 2015, a total of 29 officers from 8 ASEAN Member States have graduated from the ACE Programme from the first batch in 2014 and second batch in 2015.

Following the inception of “One ASEAN One Response” vision in the 25th ASEAN Committee for Disaster Management (ACDM) Meeting in 2014, in 2015 the AHA Centre started to introduce the vision to the ASEAN Member States. The AHA Centre reached out to government agencies in-charge of disaster management, academia, media, and private sectors. Through series of roadshow held in 2015, namely in Indonesia, Philippines, Thailand and Cambodia, the AHA Centre introduced the vision to those stakeholders, with a hope that in the future disaster management would be embraced as everybody’s business and disaster management co-operation among all stakeholders in ASEAN communities would be established for a more resilient region.

A landmark momentum took place in November, as the AHA Centre and the Singapore’s corporate alliance - the Corporate Citizen Foundation (CCF) signed a Memorandum of Intent on disaster management cooperation. The Memorandum of Intent (MoI) was signed between the AHA Centre’s Executive Director, Said Faisal, and Mr. Hassan Ahmad, the Executive Director of CCF. Mr. Hassan Ahmad. The MoI marked a significant step forward for the ASEAN Agreement on Disaster Management and Emergency Response (AADMER) – the legal instrument, which is a proactive regional framework for cooperation, coordination, technical assistance, and resource mobilisation in all aspects of disaster management, involving stakeholders from all sectors.

With the term of ASEAN Agreement on Disaster Management and Emergency Response (AADMER) work plan 2010 – 2015 coming to an end, the AHA Centre also took part in the development of Post-2015 AADMER Work Programme with the ASEAN Secretariat and ASEAN Committee on Disaster Management (ACDM).
Emergency Response in 2015

Malaysia Floods

January 2015

Floods occurred in several areas in Malaysia Peninsular, including Johor, Kelantan, Perak, Pahang and Terengganu. These were due to continuous heavy rainfall caused by Northeast Monsoon in the last weeks of December 2014. On 30 December 2014 the number of displaced population peaked to 247,104. The floods emergency continued until the first week of January, which later included Sabah due to heavy rainfall brought by Tropical Depression 'Jangmi'.

As of 9 January 2015 the National Security Council of Malaysia (Majelis Keselamatan Negara/MKN) through Portal Bencana (disaster portal) reported 17 deaths and the displacement of 5,209 families or 19,494 people. The floods also damaged 3,840 houses and blocked most roads in affected areas. 3,000 tents were provided to temporarily accommodate disaster victims. The Army operated four Flood Aid Collection Centres, while the Government of Malaysia deployed 100 SMART (Special Malaysia Disaster Assistance and Rescue Team) personnel to respond to the incident. MKN, other governmental stakeholders and the Malaysian Armed Forces provided swift emergency assessment, evacuation and relief support to the affected communities.

The AHA Centre deployed three ASEAN Emergency Response and Assessment Team (ERAT) from the AHA Centre and mobilised Disaster Emergency Logistic System for ASEAN (DELSA) which was made possible by the support from Government of Japan. The AHA Centre provided 538 family tents, 538 family kits, 498 shelter toolkits, 1,000 rolls of tarpaulins, and 1,500 kitchen sets. All relief items were transported to Kelantan state and handed over to MKN.

Neighbouring ASEAN Member States also took part in the response. The Government of Singapore mobilised seven water purification units along with the Singapore Civil Defence Force (SCDF) and the Singapore Armed Forces personnel. Singapore also pledged SGD 100,000 of aid channelled through Singapore Red Cross to Malaysian Red Crescent Society. Government of Thailand provided 500 tons of rice delivered through the border area of Thailand and Malaysia.

Impacts

- Affecting 6 States: Johor, Kelantan, Perak, Pahang, Terengganu, Sabah
- 17 deaths
- 77,703 people affected
- 3,840 houses damaged
- most roads in affected areas blocked

ASEAN Solidarity Response

AHA Centre

Deployed 3 ASEAN – ERAT members

Provided DELSA relief items:
- 538 family tents
- 538 family kits
- 498 shelter toolkits
- 1,000 rolls of tarpaulins
- 1,500 kitchen sets

Singapore

7 water purification units

Singapore Civil Defence Force (SCDF) and Singapore Armed Forces personnel

Pledged SGD 100,000 of aid channelled through Singapore Red Cross to Malaysian Red Crescent Society.

Thailand

500 tons of rice

Myanmar Floods

August 2015

From the end of June 2015 through July, Myanmar experienced torrential rains as a result of Cyclone Komen. These triggered severe floods that affected 13 states and regions in Myanmar, which include: Rakhine, Sagaing, Magway, Chin, Ayeyarwady, Bago, Mandalay, Kayin, Kutkai, Shan, Mon, Yangon and Tanintharyi. On 31 July 2015 the President of Myanmar declared Chin, Magway, Rakhine, and Sagaing as natural disaster affected areas.

On 10 August 2015 the Government formed the Recovery Coordination Centre (RCC) to implement the recovery strategy and plan. On 14 August 2015 the Vice-President shared the national recovery coordination structure, along with coordination mechanisms and guiding principles for building back better.

On 15 August 2015 the Myanmar National Disaster Management Council (NDMC) reported that the floods have claimed 110 lives, affected 1,615,335 people, and displaced 333,178 of the population. It ravaged farmlands, with million acres of agricultural land inundated and 910,337 acres of crops damaged. The floods also ruined houses and severely damaged infrastructures. The floods hampered the transportation in Myanmar as many roads and bridges were damaged or covered in mud and debris.

In the spirit of “One ASEAN One Response”, ASEAN Member States through the AHA Centre deployed In-country Coordination Team (ICCT) consisting of two AHA Centre staffs + 7 ASEAN-ERAT members from Brunei Darussalam, Indonesia, the AHA Centre, Plan International (part of AADMER Partnership Group), Indonesian Red Cross and ASEAN Secretariat on 5-19 August 2015. The AHA Centre staffs’ assignment was to support Myanmar’s Relief and Resettlement Department’s efforts in data collection, analysis, and reporting, whereas the seven ASEAN-ERAT members were assigned to support the Government of Myanmar in logistical arrangements and in joint disaster assessment.

Relief goods were mobilised from DELSA, consisting of various relief items, compiled specifically for flooding situations and based on the need of the affected country. One trip of C-17 aircraft of Australian Defence Force (ADF) has contributed to transport the relief items from DELSA Warehouse in Malaysia to Yangon, Myanmar on 11 August 2015.

At the request of the Government of Myanmar, ASEAN-ERAT was tasked with conducting the flood impact assessment in Inlapu and Maubin District of the Ayeryawaddy Region, and establishing two Mobile Storage Units at the Relief and Resettlement Department (RRD) in Yangon and Mandalay as well as facilitating incoming relief items. The AHA Centre’s Mission Team Leader was stationed in Naypyitaw to facilitate coordination with the National Government and other international organisations. The AHA Centre also provided situational analysis and resource-tracking capabilities to the National Emergency Operation Centre (EOC).

Myanmar Floods

Impacts

- 110 deaths
- 1,615,335 affected population
- 333,178 people displaced
- 1.4 Million acres of agricultural land inundated
- 910,000 acres of crops damaged
- 16,095 houses damaged

ASEAN Solidarity Response

AHA Centre
- Deployed In-Country Coordination Team (ICCT), consisting of 2 AHA Centre staffs + 7 ASEAN-ERAT members
- Provided DELSA relief items:
  - 2,000 tarpaulins
  - 2,000 collapsible jerry cans
  - 2,000 mosquito nets
  - 4 aluminium boats with engine
  - 3 mobile storage unit
  - 2,000 family kits (purchased locally)
  - 2,000 kitchen kits (purchased locally)

Cambodia
- USD 100,000 of aid

Thailand
- Ministry of Foreign Affairs: THB 5 Million (USD 142,000)
- His Majesty the King and Her Majesty the Queen: THB 5 Million (USD 142,000)
- Government of Thailand: 120 tons of relief supplies (medical supplies, medical equipment, family kits, tents, blankets,
- The Ministry of Commerce provided 200 tons of rice

*Taken from various sources
Typhoon Koppu - locally named as Typhoon Lando - began to form at the Pacific Ocean on 13 October 2015. It moved westward and made landfall in Casiguran, Aurora Province, Philippines on 16 October with wind speed of 175 kilometres per hour (kph) and wind gust of up to 210 kph.

Koppu is reportedly the deadliest and most destructive typhoon to hit the Philippines in 2015. It brought floods to Pangasinan, Ilocos Norte, Isabela, Nueva Vizcaya, Tarlac, Bataan, Pampanga, Zambales, Vigan, and Benguet. The National Disaster Risk Reduction and Management Council (NDRRMC) of the Philippines reported 4 landslides and 479 flooding incidents, where some villages were submerged in waters up to 3-meters high.

According to the Philippine’s National Disaster Risk Reduction and Management Council (NDRRMC) Situation Update No. 22, Typhoon Koppu had claimed 48 lives, injured 83 people, and left 4 people missing.

To support the relief efforts in the Philippines, the AHA Centre deployed three staffs to Manila to liaise and coordinate with the NDRRMC. The team, along with in-country ASEAN-ERAT carried out rapid damage and need assessment, as well as re-established the communications. One ASEAN-ERAT member was sent to Casiguran, Aurora, to be part of the emergency telecommunication cluster to bridge communication requirements prior to the completion of network restoration. The team demobilised on 29 October 2015. The AHA Centre, through DELSA supported by the Government of Japan, handed over 1,000 rolls of tarpaulins to the NDRRMC.

Source of Map: http://www.namria.gov.ph

*taken from NDRRMC Situation Update no. 22
Typhoon ‘Melor’, local name ‘Nona’ entered the Philippine Area of Responsibility (PAR) in the morning of 12 December 2015 as a Tropical Storm. On the following day, it further intensified to a Typhoon at 4:00 PM. It made its first landfall on 14 December 2015 with the timeline provided below:

**Landfalls**

1. 14 December 2015, 11:00 AM
   Batag Island, Laoang, Northern Samar

2. 14 December 2015, 4:00 PM
   Bulusan, Sorsogon

3. 14 December 2015, 9:45 PM
   Burias Island, Masbate

4. 15 December 2015, 5:30 AM
   Banton Island, Romblon

5. 15 December 2015, 10:30 AM
   Pinamalayan, Oriental Mindoro

After making five landfalls, Typhoon ‘Melor’ finally weakened and dissipated on 19 December 2015. Based on the NDRRMC Situation Report No 19 on 24 December 2015, the typhoon caused 42 deaths, 24 injured and 4 missing. The typhoon also totally damaged 279,487 houses along its path particularly in Oriental Mindoro, Sorsogon and Northern Samar Provinces. As of December, 287,227 people are still being served inside and outside evacuation centres.

Assessment (PDRA) meetings were conducted to coordinate the preparedness effort. Prior to the landfall, at least 742,991 people were pre-emptively evacuated to safer areas. Relief items as well as personnel were prepositioned to the affected region.

As part of the ASEAN’s solidarity, the AHA Centre deployed two of its members to liaise and coordinate accordingly with the National Disaster Risk Reduction and Management Council (NDRRMC) of the Philippines. Concurrently, daily situational briefing was done at the AHA Centre’s Emergency Operations Centre (EOC) in Indonesia.

As the condition improved swiftly in late December, the situation became under the capacity of the Government of the Philippines to overcome. No request for international assistance was made at that time.
The AHA Centre’s operation centre is supported by sets of Information and Communication Technology (ICT)-based tools, including the ASEAN Disaster Monitoring and Response System (DMRS), ASEAN Disaster Information Network (ADInet) and Web-based Emergency Operations Centre (WebEOC).

**Tools for Disaster Preparedness and Emergency Response**

The DMRS is a disaster information software developed by the Pacific Disaster Centre (PDC). It consolidates hazard data from international and regional sources in a near real-time system, providing a “snapshot” of events and possible impacts encompassing the entire ASEAN region. With these capabilities, DMRS provides situational awareness and early warning which support the decision-making processes for disaster preparedness and response in the AHA Centre.

In 2015, the AHA Centre upgraded the DMRS from DMRS version 5.2.5 to version 5.3.3. This newest version of DMRS uses Google Map as its base map, providing a more detailed spatial overview of the area. It is built with HTML 5 which increases the software’s compatibility with mobile gadget, thus allowing faster access. DMRS 5.3.3 became more user-friendly while at the same time provides more possibilities for analysis with the addition of more comprehensive information layers. A training on this upgraded version had been provided by the PDC with the support from the United States Government in May 2015.

The AHA Centre utilises ASEAN DMRS to monitor daily disaster situation in the region.
The Disaster Monitoring and Analysis team of the AHA Centre regularly record natural disasters occurring in ASEAN region in ADInet. Public can view the record at www.adinet.ahacentre.org. Disasters reported in the ADInet shall fulfil the following criteria:

1. More than 100 people affected
2. Involving more than 1 sub-district

In 2015 ADInet’s record showed a noticeable decrease in the number of disasters occurring in the region. In 2013, 322 disaster incidents were recorded, followed by 290 incidents 2014, and reduced even further to 114 in 2015. The number of affected populations also decreased, from 39,820,036 and 17,883,714 in 2013 and 2014 respectively, to 6,742,050 in 2015.

### Type of Disaster in 2015

- **Earthquake**: 3 cases
- **Flood**: 74 cases
- **Drought**: 12 cases
- **Volcanic Eruption**: 6 cases
- **Landslide**: 10 cases

### Total Disasters in 2015

- **Total Disasters**: 114 cases

### Damage & Casualty in 2015

- **Affected Houses**: 570,000 units
- **Affected Agricultural Area**: 1,100,000 ha
- **Affected Population**: 6,750,000 people
- **Death**: 411 people
- **Displaced People**: 2,500,000 people

### Disaster Incident in 2013 - 2015

To directly share, communicate, and consolidate information on ASEAN’s joint emergency response, AHA Centre, ASEAN countries’ NDMOs, and ASEAN Secretariat utilizes WebEOC, a web-based crisis information management system that enables real-time information sharing to help emergency operation managers make sound decisions quickly.

The WebEOC has been utilised 14 times throughout the year 2015 in various exercises as well as emergency responses (more info from ad).
In February 2015 the AHA Centre Executive (ACE) Programme welcomed its second batch. 16 disaster management officers from Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, Philippines, Thailand, and Viet Nam participated in the second batch of this programme.

The ACE Programme is an innovative and dynamic six-month programme which is open equally to all ten ASEAN Member States. The programme intends to develop future leaders of disaster management in the ASEAN region. It is managed by the AHA Centre and supported by the Government of Japan through the Japan-ASEAN Integration Fund (JAIF). The curriculum of the Programme is crafted to increase ASEAN National Disaster Management Officers’ (NDMOs) officers’ capacity in various aspects of disaster management and leadership through on-the-job trainings in the AHA Centre and other various disaster management and leadership-related trainings.

All ACE Programme officers engaged actively in a total of 1,000 hours of combined learning sessions. They have accomplished the programme on 31 July 2015 after attending on-the-job training sessions in the AHA Centre, series of training courses, and study visits to New Zealand, Japan, and Indonesia to learn from those countries’ disaster management experts, and their experiences in coping with disasters.

The training programs in ACE Programme second batch were conducted through a partnership with, as well as support from ASEAN Member States’ NDMOs, Government of Japan, Government of New Zealand, Government of the United States of America, University of Canterbury New Zealand, the United Nations Office for the Coordination of Humanitarian Affairs (UNOCHA), United Nations Humanitarian Response Depot (UNHRD), Australian Government, and others.

The official commencement ceremony of ACE Programme Second Batch held on 16 February 2015 was graced with the presence of H.E. Le Luong Minh - the Secretary-General of ASEAN, H.E. Koichi Ahitomi – the Ambassador of Japan to ASEAN, Pongpoon Dapuka Haji Rosli bin Pengiran Haji Chuchu – Director of National Disaster Management Centre of Brunei Darussalam as the Chair of ASEAN Committee on Disaster Management (ACDM), and the Governing Board of the AHA Centre representatives of ASEAN Dialogue Societies, RedR Australia and RedR UK, London School Academy, UNHRD, World Food Programme (WFP), International Organisation for Migration (IOM), United States Forest Service (USFS), Save the Children, Civic Force Japan, the International Federation of Red and Red Crescent Societies (IFRC), Indonesian Red Cross, New Zealand, Canterbury New Zealand, the United Nations Office for the Coordination of Humanitarian Affairs (UNOCHA), United Nations Humanitarian Response Depot (UNHRD), World Food Programme (WFP), International Organisation for Migration (IOM), United States Forest Service (USFS), Save the Children, Civic Force Japan, the International Federation of Red and Red Crescent Societies (IFRC), Indonesian Red Cross Societies, RedR Australas and RedR UK, London School Academy, Cohn and Wolfe Public Relations, and British Council.

The application process for the third batch of ACE Programme started in October 2015 and the Programme will commence in March 2016.
The Journey of the Second Batch of

The AHA Centre Executive (ACE) Programme
The exercises through the After-Action Review (AAR) session. The AHA Centre participated in all three components, with the emphasis on the coordinating role of the AHA Centre, and its role as the “engine” of AADMER to ensure ASEAN’s collective response.

ARF-DiREx TTX Working Group selected the following core capabilities as the foundations to develop the exercise objectives and scenario:

- Early warning
- Initial response
- Communication
- Coordination mechanism
- Integration of exercises
- Civil-military coordination
- Public information and warning
- Consular affairs

The general purpose of the exercise was to measure and validate the performance of the above capabilities. The exercises followed the scenario of a tropical typhoon named INDERA which hit Peninsular Malaysia with wind speed of up to 200 kph on 19 May and brought massive damage and loss of life. The exercises were designed to simulate real disaster situations in the most realistic manner. Participants must work on the tasks of managing mass casualties, receiving and distributing aid and humanitarian assistance, catering to special needs of vulnerable populations, managing consular assistance for foreign tourists in disaster-affected areas, sharing of information and coordinating with foreign embassies, managing media and controlling information flow, and coordinating the roles of international volunteers.

In response to the scenario, the AHA Centre deployed ASEAN-ERAT to the affected sites. The team consisted of ten members from Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, Singapore, and the AHA Centre. In parallel, ASEAN Member States also deployed their assets and resources. The AHA Centre was divided into two groups, one group was at the field level while focused on coordination at the International Organisations Coordination Centre (IOCC) located at Malaysia’s Emergency Operations Centre (EOC).
The AHA Centre took part in Gema Bhakti, a bilateral joint exercise that focused on operational-level planning and the execution of combined military operations between Indonesia and the United States of America (USA). From 14 to 23 September 2015, nearly 200 participants which consist of 90 personnel from the Indonesian Armed Forces (TNI) and 70 personnel from the US Pacific Command (US-PACOM) actively engaged in the bilateral exercise. Gema Bhakti aimed to promote positive relationship between the Indonesian and US Army, improve cultural awareness, share knowledge and experiences, create better understanding on each other’s capabilities, as well as to coordinate and integrate military support for countries affected by natural disasters through the Multi-National Coordination Centre.

Numerous experts in disaster management contributed to the discussions that were arranged into four working groups; Lane A with the focus on Urban Search and Rescue (USAR), Lane B on Humanitarian Operations, Lane C on Combined Task Force, and Lane D on Multinational Coordination. The AHA Centre took part in the Humanitarian Operations and Civil-Military Coordination groups to discuss about the ASEAN regional mechanisms on disaster management, and to explain about the AHA Centre’s focus on disaster management, namely disaster monitoring, preparedness and response.

The AHA Centre, in participation with the Indonesian National Disaster Management Authority (BNPB) organised the 5th ASEAN-ERAT Induction Course on 19 – 20 June 2015 in Bogor, Indonesia, to train the new batch of ASEAN-ERAT. 29 participants, from nine ASEAN Member States including 16 ACE Programme Officers, two representatives from civil society organisations spearheaded by AADMER Partnership Group (APG), two Red Cross Societies (Thailand and Indonesian Red Cross Societies), two ASEAN Secretariat staffs and three the AHA Centre staffs.

The latest ASEAN-ERAT batch brought the total number of trained members from 90 in 2014 to 118 in 2015.

The Induction Course was structured into two major components. The first part of the course consisted of class room that included trainings on assessment methodology, international humanitarian system, logistics, capacity assessment, and stress management. Participants also presented the custom and culture of their countries to help other participants learn about common ways of communicating and interacting with local communities.

Second part was the field simulation exercise that allowed participants to simulate a response efforts made by ERAT Members when a disaster occurs.

The exercise scenario and settings depicted various challenges faced by emergency responders on the ground. Based on the scenario of 7.2 – magnitude earthquake that claimed thousands of lives, the ASEAN-ERAT members simulated activities during deployment which included arrival, immigration and custom clearance, contact with National Focal Points, establishment of field response plan, establishment of the ASEAN Joint Operation and Coordination Centre of ASEAN (JOCCA), field assessments, coordination with international humanitarian organisations, dealing with media, and demobilisation.
The role of the ASEAN-ERAT support the government, when needed by working closely with the National Disaster Management Office of the affected Member State in the initial phases of a disaster to:

1. Conduct rapid assessment
2. Coordinate mobilization and deployment of regional disaster management capacity
3. Facilitate the incoming relief assistance from the ASEAN Member States

Established in 2008 during Cyclone Nargis Emergency Response Mission, ASEAN – ERAT initially stood for ASEAN Emergency Rapid Assessment Team whose duty focused on carrying out impact and need assessment. Further, recognising the need to strengthen ASEAN’s preparedness and capacity to respond to disasters, the ACDM adopted AADMER in 2010. Among the Work Programme flagship project was the “establishment of a fully-functional emergency rapid assessment team”. Following that commitment, the first ASEAN-ERAT Induction Course was conducted in Singapore.

Learning from the experiences during ASEAN – ERAT’s disaster emergency response missions in the following years, ASEAN – ERAT had their duties expanded from carrying out impact and need assessment to managing both rapid assessment and other emergency response duties. The 23rd ACDM Committee on Disaster Management (ACDM) Meeting in November 2013 agreed on the evolution of ASEAN-ERAT from ‘ASEAN Emergency Rapid Assessment Team’ to ‘ASEAN Emergency Response and Assessment Team’.

Referring to the ACDM - Preparedness and Response Working Group meeting conducted in April 2015, in Malaysia, it was agreed that the ASEAN-ERAT Advisory Group should be established for the purpose of providing strategic and technical advice to strengthen the ASEAN-ERAT system. The ASEAN-ERAT Advisory Group comprises of one representative representing each NDMO, ASEAN Secretariat, and the AHA Centre. The AHA Centre will serve as the secretariat of ASEAN-ERAT Advisory Group.

To further define the role of the ASEAN-ERAT Advisory Group, the following shall be the functions of the ASEAN-ERAT Advisory Group:

- Advise on the expected role and responsibilities of the ASEAN-ERAT
- Advise on the capacity development of the ASEAN-ERAT
- Advise to improve future ASEAN-ERAT deployment
- Advise to promote ASEAN-ERAT beyond National Disaster Management Office
- Advise on the implementation of ASEAN-ERAT Transformation plan 2015-2020
- Provide inputs on ASEAN-ERAT related projects
- Serve as coordinator of National ASEAN-ERAT network
- Review and amend the ToR of ASEAN-ERAT Advisory Group as necessary

To mitigate the gaps and to strengthen the capacity of ASEAN-ERAT, the AHA Centre staff regardless the job position is required to become ASEAN-ERAT members for possible deployment at any given time.

The ASEAN-ERAT Advisory Group shall meet at least once a year or whenever necessary. The first ASEAN-ERAT Advisory Group convened initially in July 2015 right after the 5th ASEAN-ERAT Induction Course in Indonesia.

Before becoming a member of ASEAN-ERAT, each member must participate in the induction course to ensure that they are equipped with standardised methodologies and skills, such as rapid assessment, logistics, and on-site coordination.

The ASEAN-ERAT Advisory Group will serve as the secretariat of ASEAN-ERAT Advisory Group.

In an effort to realise ‘One ASEAN One Response’ vision, the ASEAN-ERAT will undergo transformations. The ASEAN-ERAT Transformation Plan 2015 – 2020 consists of:

1. The inclusion of relevant government departments, civil society organisations (CSOs), and the private sector
2. The specialization of training and advanced courses
3. The expansion of roles for post-disaster needs assessment (PDNA) and damage and loss assessment (DALA), including the facilitation of exercises and trainings
4. The strengthening of networking with technical partners such as information and communication technology and geographic information system (GIS) teams.

PROJECTING ASEAN’S PROGRESS ON DISASTER MANAGEMENT AND ENHANCING THE AHA CENTRE CAPACITY

In 2015, the AHA Centre participated in numerous trainings, workshops and conferences related to disaster management, to project and enhance ASEAN’s capacity on disaster management.
Phnom Penh, Cambodia 21-23 April 2015

26th ACDM Meeting, 2nd Meeting of the Governing Board of the AHA Centre, 3rd Joint Task Force Meeting on HADR.

Cambodia hosted the 26th ACDM Committee on Disaster Management (ACDM) Meeting in Phnom Penh. ACDM Focal Points or representatives from Brunei Darussalam, Cambodia, Indonesia, Malaysia, Myanmar, Lao PDR, Philippines, Singapore, Thailand, and Viet Nam as well as representatives from ASEAN Secretariat and the AHA Centre attended the meeting.

During the Meeting, Brunei Darussalam handed over the ACDM Chairmanship to Cambodia for the period of 2015 - 2016. The Meeting acknowledged the AHA Centre’s efforts in reinforcing the region’s capacities to respond to disasters together, as well as to build trust with international community. ACDM Chair also acknowledged the AHA Centre’s central roles in enhancing the ASEAN-ERAT, and commended the launch of the second batch of ACE Programme.

H.E. Ross Sovann, Deputy Secretary General of the National Committee on Disaster Management of Cambodia as the new Chair of ACDM highlighted priority areas and strategic directions to be achieved during Cambodia’s chairmanship:

- Development of the “ASEAN Declaration on One ASEAN, One Response: ASEAN Responding to Disasters as One in the Region and Outside of the Region”
- Promoting cross-sectoral and multi-stakeholders participation to establish consistency in all of ASEAN policies and programmes related to disaster management
- Ensuring the sustainability of the AHA Centre and the development of Post-2015 AADMER Work Programme

The 26th ACDM Meeting was held back-to-back with the 2nd Meeting of the Governing Board of the AHA Centre, the ACDM Session on East Asia Summit (EAS) Cooperation on Disaster Management, and the 3rd Joint Task Force Meeting to promote synergy with other relevant ASEAN bodies on Humanitarian Assistance and Disaster Relief (HADR) held on 21-23 April 2015.

In reporting the implementation of the Strategic Plan of the AHA Centre for 2015, the Meeting believes that the institutionalisation and operationalisation of the AHA Centre is important in order to achieve the ‘One ASEAN, One Response’ vision.

Phnom Penh, Cambodia 22 April 2015

2nd Meeting of Governing Board of the AHA Centre

On 22 April 2015, members of the Governing Board, ASEAN Secretariat, and the AHA Centre convened in the Second Meeting of the Governing Board of the AHA Centre. The Board discussed the progress report on the operationalisation of the AHA Centre, where they noted the publication of the 2014 annual report, and the introduction of the Centre’s monthly bulletin “The Column”.

In reporting the implementation of the 2015 Strategic Plan of the AHA Centre, the Meeting believes that the institutionalisation and operationalisation of the AHA Centre is important to achieve the ‘One ASEAN One Response’ vision.
Phnom Penh, Cambodia
14 – 16 December 2015

Cambodia hosted the 27th ACDM Meeting on 14 – 16 December 2015 in Phnom Penh.

H.E. Dr. Nhim Vanda, Senior Minister in Charge of Special Mission and First Vice President of the National Committee for Disaster Management of the Kingdom of Cambodia, delivered opening remarks at the 27th Meeting of the ACDM on 14 December 2015. H.E. Nhim Vanda emphasised the need to finalise the Declaration on ASEAN One Response, and the need to continuously support the AHA Centre through ASEAN Member States contributions. The 27th Meeting exchanged views on the Standard Operating Procedure (SOP) on Facilitation and Utilisation of Military Assets for HADR submitted by the ASEAN Defence Senior Officials Meeting (ADSM) to be included as SASOP Chapter VI. The Meeting agreed to test SOP as SASOP Chapter VI and tasked the AHA Centre to immediately conduct a table-top exercise to test its applicability. The results of the table-top exercise will then be reported and submitted to the ACDM for final adoption of SASOP Chapter VI.

On Disaster Emergency Logistic System for ASEAN (DELSA), particularly the outcomes of the feasibility study on establishing satellite warehouses in the region, the Meeting noted the expression of support coming from several ASEAN Member States to the project, which looked forward to continue the discussion with the AHA Centre on the details of the implementation of the satellite warehouse project. The Meeting agreed to task the ACDM Working Group on Preparedness and Response to further study the findings of the feasibility study team.

27th ACDM Meeting adopted the Guidelines on the use of ASEAN armbands in HADR exercises and actual response operations within and outside the ASEAN region, and agreed to promote the use of the ASEAN armbands with other sectors and stakeholders in ASEAN Member States.

On ‘One ASEAN One Response’ matters, the Meeting agreed to endorse the fifth version of the draft Declaration on ASEAN One Response as the final version for endorsement by the 3rd AMMDM and 4th COP to AADMER, and subsequent adoption and signature by the ASEAN Leaders during the 28th ASEAN Summit in 2016 in Lao PDR.

The 2015 marked the end of AADMER Work Programme year 2010 – 2015. Thus, discussions on the Work Programme accomplishment reports, and the AADMER Work Programme 2016 – 2025 were also parts of the Meeting’s agenda. ASEAN Secretariat presented the key outcomes of the Post-2015 AADMER Strategic Policy Dialogue and the Meeting agreed to continue with the publication of the proceedings of the Post-2015 AADMER Strategic Policy Dialogue, and to use the AADMER Fund for this purpose. Regarding the upcoming year’s plan, Brunei Darussalam as the host of ARDEX 2016 presented the updates on the exercise’s preparation.

The AHA Centre
Annual Report 2015

031

3rd Meeting of the Governing Board of the AHA Centre

Phnom Penh, Cambodia, 15 December 2015

The Third Meeting of the Governing Board of the ASEAN Coordinating Centre for Humanitarian Assistance on disaster management (the AHA Centre) was held on 15 December 2015, Phnom Penh, Cambodia. The Meeting was Chaired by H.E. Ma Norith, Deputy Secretary-General of National Committee for Disaster Management (NCDM) of Cambodia and co-chaired by Dr. Raditya Jati, Deputy Director for Disaster Prevention, Indonesian National Disaster Management Authority (BNBP).

The meeting was attended by all National Focal Points from Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, Philippines, Singapore, Thailand and Viet Nam, as well as Executive Director of the AHA Centre as the Secretary to the Governing Board and ASEAN Secretariat as ex-officio member.

The 3rd AMMDM and the 4th COP to AADMER were held on 16 December 2015 in Phnom Penh, Cambodia. The Meeting was opened by His Excellency Hun Sen, the Prime Minister of the Kingdom of Cambodia, and attended by Ministers in-charge of Disaster Management or their representatives and their respective delegations, the Secretary-General of ASEAN and his delegation, and the Executive Director of the AHA Centre and his delegation.

The Meeting exchanged views on the implementation of AADMER in the next ten years. The Meeting noted the recent development of regional and global frameworks, such as Sendai Framework for Disaster Risk Reduction 2015-2030, 2030 Agenda for Sustainable Development, the recent Paris Agreement under UNFCCC, the World Humanitarian Summit’s consultations, Asia-Pacific Economic Cooperation (APEC) Disaster Risk Reduction Framework, and the ASEAN 2025: Forging Ahead Together adopted by the ASEAN Leaders at the 27th ASEAN Summit in November 2015, which informed and guided the development of the ASEAN Vision 2025 on Disaster Management.

The Meeting adopted the latest draft of the Agreement between the Government of the Republic of Indonesia and the AHA Centre on Hosting and Granting Privileges and Immunities.

The AHA Centre presented the new AHA Centre corporate identity including the new logo and brand guidelines. The AHA Centre corporate design manual handbook and its softcopy were distributed to the Governing Board members. The Meeting agreed to utilise the new logo and implement the brand guidelines effective 2016.

The Meeting also agreed on the urgency and importance on the adjustment of annual and equal contribution to the AHA Centre to ensure the financial stability of the AHA Centre in 2016. Changes in the utilisation of AADMER fund were discussed, while the Meeting also agreed for an incremental increase for the AHA Centre Fund and recommended that the Ministers as the AADMER Conference of the Parties support the agreement of the Meeting for the incremental increase of Member States’ annual and equal contributions for the AHA Centre Fund starting in 2016. The amount of the increased contribution for the AHA Centre Fund, which will start in 2016, will be agreed at the 28th Meeting of the ACDM and the 4th Meeting of the Governing Board of the AHA Centre in April 2016 in Indonesia.

Disaster Risk Reduction Framework, and the ASEAN 2025: Forging Ahead Together adopted by the ASEAN Leaders at the 27th ASEAN Summit in November 2015, which informed and guided the development of the ASEAN Vision 2025 on Disaster Management.

The Meeting adopted the ASEAN 2025: Vision on Disaster Management as the strategic policy document that outlines the directions that will guide ASEAN in the next ten (10) years in the area of disaster management and emergency response, particularly identifying three mutually inclusive elements namely (i) Institutionalisation and Communications, (ii) Finance and Resource Mobilisation, and (iii) Partnerships and Innovations, that would move the implementation of AADMER forward to a people-centred, people-oriented, financially sustainable, and networked approach by 2025. The Meeting further noted that this AADMER Work Programme for 2016-2020, which would be launched at the 28th Meeting of the ACDM in April 2016 in Indonesia, has eight Priority Programmes that would pave the way and enable ASEAN to become the pioneer and thought leader on disaster management.

The Meeting materialized its support towards One ASEAN One Response: ASEAN Responding to Disasters as One in the Region and Outside the Region by endorsing the final draft of the Declaration.

The Meeting agreed to support the enhancement of ASEAN’s visibility in humanitarian response by carrying both national and ASEAN emblems to underscore that ASEAN is responding together as one.

In 2015, the AHA Centre proactively reached out to disaster management stakeholders across the region. Under ‘One ASEAN One Response’ vision and through a variety of approaches, the AHA Centre engaged with a wider range of stakeholders, line ministries in-charge of disaster management, CSO, academia, private sector, and media.

‘One ASEAN One Response’ is the vision to bring together all sectors of ASEAN communities to respond to major disaster in or outside the ASEAN region. To build this sense of solidarity, in 2015 the AHA Centre brought together representatives of disaster management stakeholders in ASEAN Member States through series of One ASEAN One Response Roadshow. The One ASEAN One Response Roadshow was supported by the Government of Australia, jointly organised with the NDMOs in Indonesia, Philippines, Thailand, and Cambodia.

One ASEAN One Response Roadshow also showcased DELSA Relief Items as well as the ICT Kit. Moreover, the roadshows have also engaged with media and generated several news along the way.

By introducing the vision to various stakeholders, One ASEAN One Response Roadshow aims to raise the awareness of stakeholders on regional disaster management mechanisms, while at the same time, to also create a better understanding for relevant sectors in disaster management to jointly respond to disasters in outside of the ASEAN Region. The Roadshow utilises knowledge-sharing approach and created a platform for discussions on the vision.

Member Countries’ support, and stakeholders’ attendance in the Roadshow shows the country’s willingness to help achieve the ‘One ASEAN One Response’ vision.

In February 2015 the AHA Centre launched the first edition of ‘The Column’, the AHA Centre’s monthly news bulletin. The Column consists of the following sections:

- **Editors’ Note**: Summarizing the current issues related to disaster management in the region, and the activities done by the AHA Centre in the previous month.

- **News Highlight**: Covering the biggest event or activities (including disaster emergency response mission, meetings, and disaster relief simulation exercise) where the AHA Centre plays major roles.

- **News Story**: Covering the events or activities organized by the AHA Centre, or where the AHA Centre participates.

- **Insights**: Containing learning points from the AHA Centre’s activities, for instance the lessons taught in the trainings.

- **Monthly Disaster Outlook**: Summarizing the disaster information in ASEAN Region in the latest month.

- **The Other Side**: Featuring the profiles of prominent figures in ASEAN’s disaster management, speakers, trainers, or participants in the AHA Centre’s activities, or the people behind the AHA Centre.

The AHA Centre introduced ‘The Column’ to the ACDM in the 26th ACDM Meeting in April 2015 and received positive response. ‘The Column’ is available in prints and digital version. Every first week of the month the AHA Centre produces printed and electronic copies reaching to more than 3000 viewers including through digital channel such as Twitter, Facebook, website and on-line subscribers.

The 7th DELSA Project Steering Committee Meeting

Kuala Lumpur, Malaysia, September 2015

On 21 September 2015, the Project Steering Committee (PSC) of Disaster Emergency Logistics System for ASEAN (DELSA) gathered in Kuala Lumpur, Malaysia for its 7th PSC Meeting. The PSC, which consists of Malaysia and Singapore as the Co-chairs of the ACDM Working Group on Preparedness and Response; representatives from Japan Mission to ASEAN, Japan-ASEAN Integration Fund (JAIF), and the ASEAN Secretariat gathered to discuss issues related to the progress of the project.

The AHA Centre’s DELSA Project Management Team presented the progress updates to the PSC from each line of works under the Project, namely the ACE Programme, Communications and Public Relations, Knowledge and Change Management, Logistics, Finance, and the development of DELSA Phase 2 led by the DELSA Programme Coordinator. Among the matters discussed were improvements made to the ACE Programme curriculum, and the working draft on new the AHA Centre corporate identity profile - including the new logo, and the public outreach activities conducted from the period of April – September 2015.

The PSC also received the updates on current status of the DELSA emergency stockpiles, the current financial status, and the updates from DELSA Phase 2 development.

ICT Phase 2 Project Steering Committee Meeting

May 2015

On 12 May 2015, the PSC of ICT Phase 2 Project convened for the 7th ICT Phase 2 PSC Meeting. Indonesia and Singapore as the Lead Member States for ICT led a live video conference meeting attended by representatives from the Singapore Civil Defense Force (SCDF), JAIF, the ASEAN Secretariat, and the Ministry of Internal Affairs and Communication of Japan.

The 7th PSC meeting marked the completion of the Project, which ran for two years and successfully helped the AHA Centre to achieve the desired level of connectivity with AMS. Overall, ICT Phase 2 Project addressed critical areas that directly affect the connectivity. Japan has been providing support for the ICT development in the AHA Centre through ICT Phase 1 and Phase 2 Projects.

- Ensure the sustainability of data and information flow during disaster and non-disaster situation.
- Ensure the availability and interoperability of ICT infrastructures including hardware and software for both the AHA Centre and NDMOs.
- Facilitate the establishment of an agreed data and information exchange mechanisms and protocols.
- Conduct systems testing through exercises and simulations.
- Undertake capacity development or capacity building for AHA Centre as well as respective NDMOs for issues related to ICT and connectivity.
Three Secretaries-General of ASEAN shared their perspectives and insights on the future of ASEAN cooperation on humanitarian action and building resilient and safer communities in the region. On 2 November 2016 H.E. Le Luong Minh, current Secretary-General of ASEAN, was joined by former Secretaries General, namely H.E. Ambassador Ong Keng Yong (2003-2007) and H.E. Dr. Surin Pitsuwan (2008-2012) during the Post-2015 ASEAN Agreement on Disaster Management and Emergency Response (AADMER) Strategic Policy Dialogue in Singapore. The discussion was facilitated by Mr Said Faisal, the Executive Director of the AHA Centre. The three Secretary Generals share the thought on where ASEAN should head upon the completion of AADMER Work Programme 2010-2015.

Secretary-General Minh emphasized the importance of people's participation in the next ten years, as ASEAN forges together towards a more people-oriented, people-centred and resilient ASEAN Community. He also suggested the adoption of more multi-sectoral and multi-pillar approach to make the region more self-reliant. Learning from the lessons from Typhoon Haiyan, ASEAN has a role in bridging regional, national and local initiatives on recovery.

Meanwhile, Dr. Surin Pitsuwan reminded that ASEAN must deliver on its own commitment to each other. He explained that from Cyclone Nargis experience in 2008, full implementation of AADMER is a basic requirement in the next ten years, and building resilience is an important move of the region, especially for people who are most at risk and vulnerable.

Ambassador Ong Keng Yong highlighted the importance of partnerships on the ground, as it will make ASEAN more confident to respond to disasters. He emphasised that it is crucial to engage as many stakeholders as possible at all levels, because humanitarian assistance is a collective effort.

The Post-2015 AADMER Strategic Policy Dialogue was attended by the ASEAN Committee on Disaster Management (ACDM), ASEAN Secretariat, ASEAN Dialogue Partners, civil society organisations, international organisations, the private sector and academe. The policy dialogue was jointly organised by the Singapore Civil Defence Force (SCDF), ASEAN Secretariat and the AHA Centre with the support of the ASEAN-Australia Cooperation for AADMER. The S. Rajaratnam School of International Studies (RSIS) was commissioned to undertake the background studies and to design and facilitate specific sessions of the policy dialogue, as funded by the ASEAN Disaster Management and Emergency Relief Fund (ACDMER) Fund.
VISIT TO THE AHA CENTRE
IN 2015

Each year, we host numerous visits from different entities and organisations coming from different parts of the world, to exchange knowledge and experience in disaster management.

SUPPORT FROM ASEAN DIALOG PARTNERS AND PARTNERS

In addition to the annual and equal contribution by the ASEAN Member States, and the Government of the Republic of Indonesia as the host to the AHA Centre, the ASEAN Dialogue Partners and partners have provided significant support either in funding or in programme development for the AHA Centre. With the support from the ASEAN Secretariat’s Disaster Management and Humanitarian Assistance Division, the AHA Centre has received accumulated funding of USD 22,464,743 as of 30 November 2015.

ASEAN Dialogue Partners

AUSTRALIA

AUD 4,565,000 (USD 4,564,930) AS OF 31 DECEMBER 2015

The Government of Australia through the Cooperation Arrangement between the Commonwealth of Australia represented by the Australia Department of Foreign Affairs and Trade (DFAT) and ASEAN on the AADMER Work Programme, 2010-2015, plays a monumental role in supporting the operationalisation of the AHA Centre since 2010, even before the centre was officially established in November 2011. As of 31 December 2015, AUD 4,565,000 was committed by the Government of Australia to support the implementation of the ASEAN Agreement on Disaster Management and Emergency Response (AADMER) Work Programme, 2010-2015, including support for the operationalisation of the AHA Centre and the capacity building for the ASEAN Secretariat.

The AHA Centre was appreciative that in May 2015, Amendment No. 6 to the Cooperation Arrangement was signed, where additional AUD 928,365 (USD 714,841) was provided for the operationalisation of AHA Centre covering the period from July 2015 to December 2016 which made the Australia’s accumulated generous funding support to the AHA Centre stood at AUD 5,177,365 or USD 2,761,451 in total recorded as at 31 December 2015.

CHINA

RMB 50,000,000 (USD 8,109,890) COMMITTED

China-ASEAN Cooperation on Disaster Management has officially been approved on 6 October 2014 by both the Government of China and the Secretary General of ASEAN.

The Memorandum of Understanding between China and ASEAN covers the period of the three years. China is committed to provide RMB 50 million of grant assistance to ASEAN to support the implementation of AADMER Work Programme, operationalisation of the AHA Centre, and ASEAN Secretariat’s capacity building on disaster management.

The implementation of this cooperation will include the area of human resource development cooperation, strengthening the coping capacity of the ASEAN Community through Community Based Disaster Risk Reduction training programmes is among the ideas. The China’s support will also taking into account on improving the facilities of the AHA Centre.

European Union (EU)

USD 3,016,836 COMMITTED

Kicked-off in 2014, the ASEAN-EU Emergency Management Programme (AEEMP) aims to strengthen the interconnectivity between various ASEAN emergency management actors namely the AHA Centre, ASEAN Secretariat and ASEAN Member States as well as their interconnection with similar emergency response bodies in the EU, including the EU Situation Room and Emergency Response Coordination Centre (ERCC). The fund allocated by EU for this programme is USD 3,016,836.

Among major activities under AEEMP are reviews and improvements of the organizational structure and design, strategic planning capabilities as well as guidelines and SOPs of the AHA Centre, learning from the regional standby arrangement operation boat practices in EU, and enhancing capacity in financial administration in line with the requirement of the European Commission Pillar Assessment. This project will also support the elaboration of technical specifications for a possible integration of computer-aided web-based software solution for the AHA Centre namely Enterprise Resource Planning (ERP). Customised training programmes for technical, operational and communication aspects of emergency management for the AHA Centre will also be developed.
Establishment of a Disaster Emergency Logistic System for ASEAN (USD 12,265,966)

On July 18, 2012, the government of Japan approved the project proposal for the Establishment of a Disaster Emergency Logistic System for ASEAN with the total budget of USD 12,265,966 as a project of Japan-ASEAN Integration Fund (JAIF). DELSA was officially launched on 7 December 2012 in Subang, Malaysia.

The project aims to develop a Disaster Emergency Logistic System for ASEAN (DELSA) through the establishment of a regional stockpile of relief items and arrangements with potential suppliers and transporters. It also aims to enhance the capacity of the AHA Centre and ASEAN Member States in disaster emergency logistic operations. In 2015 DELSA relief items were deployed to communities affected by Malaysia Flood, Myanmar Flood and Typhoon ‘Koppu’.

Another major component of DELSA is to train the future leaders of ASEAN in disaster management. The first batch of ACE Programme had been successfully conducted from January to June 2014, attended by 13 disaster management officials from seven ASEAN countries. The Second batch of ACE Programme has 16 participants from 8 ASEAN Member States and additional 5 staff members of the AHA Centre. The official opening ceremony was held on 16 February 2015 in Jakarta and has been graduated in July 2015 with Graduation Ceremony was held in Kuala Lumpur.

Feasibility Study for the Establishment of Satellite Disaster Emergency Logistic in ASEAN Member States (USD 380,431)

On July 1, 2015, the government of Japan approved the project proposal for the Feasibility Study for the Establishment of Satellite Disaster Emergency Logistic in ASEAN Member States with the total budget of USD 380,431 as a project of Japan-ASEAN Integration Fund (JAIF).

The overall objective of the project is to further enhance timely emergency preparedness and response capacity of the ASEAN Member States and the AHA Centre in both large-scale and especially in medium-scale disasters within the ASEAN region.

To achieve the overall objective, the project specially aims to identify the best approach to establish the satellite warehouses to complement the current regional warehouse to ensure the efficient and timely response of ASEAN to disasters in the region.

ICT Phase II Project: Establishment of an Integrated Information and Communication Technology system to strengthen the operation of the AHA Centre (USD 4,926,247)

The project is funded by the Government of Japan through JAIF with an investment of USD 4,926,247. While ICT Phase I concentrated on establishing ICT platform, systems, and equipment for the AHA Centre, ICT phase II focuses on establishing connectivity between the AHA Centre’s systems with those of the NDMOs. As a result, the ASEAN WebEOC System was established under the ICT Phase 2 project and in 2014 series of training on WebEOC were held for ASEAN NDMOs.

The AHA Centre 5-Year ICT Blueprint and Strategy (USD 137,392)

In 2014, the government of Japan also supported the AHA Centre in hiring an experienced ICT advisory firm to develop a five year ICT blueprint strategy. This project will develop a five year ICT blueprint strategy for obtaining sustainable ICT system, management, and operations which are stable, cost efficient, and innovative.

The eventual goal this project is to make the AHA Centre the first choice for ASEAN Member States and bodies to access disaster information. The blueprint will include the development of disaster recovery and business continuity functions and plans, enhancement of ICT system stability, enhancement of seamless connectivity between the AHA Centre and ASEAN NDMOs, ASEAN Secretariat, as well as other related bodies, establishment of emergency telecommunication team at disaster-affected sites, development of ASEAN Knowledge Management (AKM) hub, enhancement of monitoring and operation functions with introduction of new technologies ICT capacity building, internal knowledge sharing within the AHA Centre, implementation of ICT security policy, and implementation of IC asset management at the AHA Centre. Mitsubishi Research Institute (MRI) had been appointed by the Japan Government Procurement Agency to be the consultant for this project.

Under the Communication and Awareness programme, DELSA funds was also utilised to develop communication and awareness strategy on AADMER, the AHA Centre and disaster emergency logistic system, as well as ASEAN-Japan cooperation in disaster management.
The New Zealand Ministry of Foreign Affairs and Trade (New Zealand Aid Programme) had allocated NZD 600,000 of funding for the period of 2013-2015. The funding is specifically geared towards strengthening the management and operations of the AHA centre includes risk identification and monitoring, establishing and maintaining standard operation procedures, staff training needs assessment, database management, procurement and maintenance of appropriate equipment for the AHA Centre operations.

In 2014, the Government of New Zealand through the University of Canterbury’s Centre for Risk, Resilience and Renewal (UCRP3) had provided an intensive leadership in crisis training for ACE Programme participants and the AHA Centre staff in New Zealand.

Humanitarian Advisory Group (HAG) had been selected jointly by the New Zealand Government and the AHA Centre as the consultant to detailing actions and initiatives that will deliver technical and training support to the AHA Centre.

The Government of the USA through the support from its Overseas Humanitarian, Disaster and Civic Aid (OHDACA) has provided a series of capacity building programmes for the AHA Centre staff as well as the ACE Programme officers since 2013. The capacity building programme is designed based on proposal written by Harvard University’s graduates : Advancing the AHA Centre – Leveraging the US Military’s Comparative Advantage to Build Regional Disaster Response Capability. The support from the USA is mainly in strengthening the operationalization of the AHA Centre through support from US Forest Services (USFS), US-PROGRESS, Center for Excellence and Pacific Disaster Center. Among others, USFS has provided consultancy to improve the Emergency Response Organization Guidelines for the AHA Centre in January 2015.

UN-SPIDER jointly organised the ASEAN Workshop on the “Development of Mechanisms for Acquisition and Utilisation of Space-based Information during Emergency Response” conducted in Yogyakarta, Indonesia on 15 – 16 April 2014. The workshop aimed to increase the availability of and access to vital Space-based and geo-information to support sound decision-making during crisis and disaster in ASEAN region. Further cooperation with UN-SPIDER, and other regional partners such as UNISDR and ESCAP is on-going. The second phase of workshop named “Workshop on Procedural Guidelines for sharing space-based information during emergency response in ASEAN” was conducted from 16 to 18 December 2015, Sriracha, Chonburi Province, Thailand, co-organised by ESCAP, UN-SPIDER, GISTDA and the AHA Centre.
IOM facilitated a training on Camp Coordination and Camp Management (CCCM) for the ACE Programme and the AHA Centre staff, providing training on principles and tools for CCCM and shelter issues in disaster emergency situation. For this training, IOM sent their experts from IOM Regional Office for the Asia and Pacific, supported by IOM Country Office of Indonesia, Philippines, and Pakistan.

In 2014 APG had facilitated important meetings and provided secretariat support for the development of Haiyan lessons learned documents. APG also supported the AHA Centre in the development of the 5th ASEAN – ERAT Induction course curriculum, as well as provided trainer for the training. In the field of knowledge management, APG has become the AHA Centre’s partner in the ASEAN Disaster Management Training Institutes Network (ADTRAIN).

Regional Office of the International Federation of Red Cross and Red Crescent Societies (IFRC), jointly with the Indonesian Red Cross (PMI) has entered a MOU with the AHA Centre in early 2015 to provide basic training on Red Cross and Red Crescent Movement as part of their contribution in the 2nd batch of ACE Programme. The programme includes a visit to Mount Merapi and Kidul, Gajah Mada University and the emergency operation centre of local NDMO (BPBD) in Yogyakarta, and later to Aceh and Padang. Participants will be exposed to the recovery and preparedness efforts in the two locations after Indian Ocean 2004 and Padang earthquake 2009. This visit will also involve Tsunami & Disaster Mitigation Research Center (TDRMC) of Syah Kuala University and local NDMO (BPBD).

In 2014 APG had facilitated important meetings and provided secretariat support for the development of Haiyan lessons learned documents. APG also supported the AHA Centre in the development of the 5th ASEAN – ERAT Induction course curriculum, as well as provided trainer for the training. In the field of knowledge management, APG has become the AHA Centre’s partner in the ASEAN Disaster Management Training Institutes Network (ADTRAIN).

APG is the consortium of seven civil society organisations formed to assist in the implementation of AADMER. The members of the Group are namely, ChildFund International, HelpAge International, Mercy Malaysia, Oxfam, Plan International, Save the Children International, and World Vision International. APG consistently promotes people-centred AADMER implementation in ASEAN countries.

The AHA Centre entered a Memo of Intent (MoI) with Singapore based Corporate Citizen Foundation (CCF) on 1 November 2015 in Singapore. The signing of the MoI by the CCF, with CCF’s Technical Adviser and Executive Director, Hassan Ahmad and the AHA Centre’s Executive Director, Said Faisal.

The event was witnessed by the ASEAN Deputy Secretary-General Vongthep Arthakavakul, Minister for Education and Senior Minister of State for Defence, Ong Ye Kung, and CCF Chairman Lim Choo Leng. The signing took place at CCF’s first anniversary observance ceremony to mark and share on CCF’s first year of regional humanitarian service.

The MoI marked a significant step forward for the ASEAN Agreement on Disaster Management and Emergency Response (AADMER) – the legal instrument, which is a proactive regional framework for cooperation, coordination, technical assistance, and resource mobilisation in all aspects of disaster management, involving stakeholders from all sectors. In essence, the MoI closed the loop of tri-sector (public, people, private) participation in disaster management for ASEAN. The MoI allows for the active cross-sharing of resources between the two organisations including the sharing of assets, expertise and networks.

The CCF had established the Swift Emergency Evaluation Deployment (SEED), as its first responders for early access into and appropriate intervention at disaster-affected areas. SEED is simultaneously tasked to evaluate and disseminate first hand information to incoming aid responders for more informed strategic decisions. Hence, the SEED’s slogan – Bridging the First Mile. SEED’s pioneer partners include the Pacific Flight Services of ST Aerospace (aerospace); Channel NewsAsia of Mediacorp (communications); Golden Season (water) and HSL Constructor (engineering).

The AHA Centre activated its DELSA warehouse in Subang, Malaysia in response to flooding that hit several areas in the Malaysian peninsula since the fourth week of December 2014.

The ACE Programme kicked-off the second batch in February. The six-month programme aimed to develop officers from the National Disaster Management Offices (NDMOs) of ASEAN Member States as future leaders of Disaster Management within the ASEAN region through on-the-job training and various other training programmes.

In an effort to socialise the ‘One ASEAN One Response’ vision, the AHA Centre brought the ‘One ASEAN One Response’ roadshow abroad to Thailand in the month of September. Whereas the previous roadshow was held in other ASEAN Member States starting from April 2015.

In an effort to socialise the ‘One ASEAN One Response’ vision, the AHA Centre brought the ‘One ASEAN One Response’ roadshow abroad to Thailand in the month of September. Whereas the previous roadshow was held in other ASEAN Member States starting from April 2015.

The AHA Centre deployed three staffs to Manila, Philippines to liaise and coordinate with Philippines’ National Disaster Risk Reduction and Management Council (NDRRMC) in response to Typhoon Koppu, which made landfall in Catanduanes, Aurora Province in Philippines on 18 October 2015.

At the start of November, three Secretaries-General of ASEAN, H.E. Le Luong Minh, current Secretary-General of ASEAN, along with former Secretaries-General H.E. Ambassador Ong Keng Yong (2003-2007) and H.E. Dr. Surin Pitsuwan (2008-2012) sat together during the Post-2015 AADMER Strategic Policy Dialogue to share their views on the future shape of ASEAN cooperation on humanitarian action and in building resilient and safer communities in the ASEAN region.

Torrential rains since the end of June 2015 caused severe flooding in parts of Myanmar and prompted the Government of Myanmar to declare a state of emergency at the beginning of August. ASEAN, through the AHA Centre worked closely with the Government of Myanmar to help respond to the heavy floods.

A series of meeting was conducted back-to-back in Phnom Penh, Cambodia, including the 27th Meeting of the ACM and the 3rd Meeting of the Governing Board of the AHA Centre.

In an effort to socialise the ‘One ASEAN One Response’ vision, the AHA Centre brought the ‘One ASEAN One Response’ roadshow abroad to Thailand in the month of September. Whereas the previous roadshow was held in other ASEAN Member States starting from April 2015.

The 26th ACDM meeting was held on the 21 April 2015 in Cambodia where AHA Centre’s work in reinforcing the region’s capacity to respond to disasters together and build trust with the international community was acknowledged. The meeting was held back-to-back with the 2nd Governing Board Meeting of the AHA Centre, where the AHA Centre was recognised as a symbol of commitment of the ASEAN member States.
### 2016 Strategic Planning Workshop

Strategic Planning Workshop has become the AHA Centre’s annual event to jointly brainstorm, identify, and synthesize areas of priorities which lead to the complete development of the AHA Centre 2016 Work Plan. This in-house workshop was conducted in Jakarta and Sentul, Bogor from 1-7 October 2015, ended with a team-building session.

#### A 5 areas of activities, 36 projects Operations

| 1. | Second ASEAN-ERAT Advisory Group Meeting |
| 2. | ASEAN-ERAT Advance Course Curriculum and Manual |
| 3. | Sixth ASEAN-ERAT Induction Course |
| 4. | ASEAN-ERAT Mobile Application |
| 5. | Second ASEAN-ERAT Refresher Course |
| 6. | ASEAN Joint Disaster Response Plan (JDRP) Finalisation |
| 7. | Logistics Capacity Building Programme for ASEAN Member States |
| 8. | Maintaining ICT Operational Readiness |
| 9. | Improvement of the AHA Centre’s Website |
| 10. | ASEAN Disaster Information System (ASSIST) |
| 11. | Disaster Monitoring and Response System (DMRS) Enhancement and Data Integration |
| 12. | Provision of the AHA Centre Structured Geospatial Data |
| 13. | ‘One ASEAN One Response’ Roadshow |
| 14. | ARDEX 2016 (Jointly organised by the AHA Centre and Brunei Darussalam) |
| 15. | Review and Revision of SASOP |
| 16. | Establishment and Capacity Building of ASEAN Military Ready Group (AMRG) |
| 17. | Development of Incident Management Team Roadmap |
| 18. | ICT Backup Office and Systems |
| 19. | ICT Equipment Replacement and Upgrading |

#### B Knowledge and Change Management

| 1. | The AHA Centre publication “Five to Life” |
| 2. | Development of the AHA Centre’s Knowledge Repository |
| 3. | Mobile App. the AHA Centre Performance Tracking Tools |

#### C Corporate Affairs and Programme Development

1. Office relocation: safety, security and business continuity
2. Office relocation: renovations
3. Implementation of SMART Office
4. The AHA Centre 5 and 10 year Strategic Plan
5. Organisational procedures to meet EC Pillar Assessment (ECPA) requirements
6. Implementation strategy for Integrating ERP system into daily operations, 2016-2017
7. Project Management Software for project tracking within the AHA Centre
8. External periodic audit of the AHA Centre, January - December 2015
9. Improving data and documentation storage including full digital records
10. Human Resources Audit for the AHA Centre

#### D The AHA Centre’s Executive (ACE) Programme

1. The AHA Centre Executive Programme Phase 2
2. The AHA Centre Executive Programme Advanced

#### E Strategic Communications

1. “FIVE TO LIFE” Five Year Commemoration of the AHA Centre
2. The AHA Centre Crisis Communications Training

#### F There will be significant progress and changes expected to happen in 2016, among others;

- The ACE Programme will enter its third batch. Further, under DELSA Phase 2 it is expected that ACE Programme will be extended to another three batches, aimed to achieve 100 alumni.
- Another six ‘One ASEAN One Response’ roadshows to be scheduled for 2016, to be conducted in Brunei, Lao PDR, Malaysia, Myanmar, Singapore, and Viet Nam.
- The AHA Centre office to relocate to Graha BNPB, in Jakarta.
- DELSA Satellite warehouse will be established in addition to Subang, Malaysia.
- The Chairmanship of ACDM and the Governing Board of the AHA Centre will be handed over from Cambodia to Indonesia take effect in the 29th Meeting of ACDM scheduled to be held in the 2nd quarter of 2016.
- The ASEAN Regional Disaster Simulation Exercise (ARDEX) to jointly be hosted by AHA and Brunei Darussalam in October 2016.

The AHA Centre
Annual Report 2016

061

“Mr Faisal is the Executive Director of the AHA Centre. He spent numerous time and efforts to establish the AHA Centre prior to its establishment in 2011, laying grounds for the operationalisation of the organisation. With the help of the interim office of the AHA Centre, he graduated from his Master’s Degree from the University of Hartford, Connecticut USA majoring in Insurance/Finance. He spent his early career in the world of humanitarian assistance as the Deputy Head of Rehabilitation and Reconstruction Bureau (RBR) in Ayacucho, Peru as the Indian Ocean Tsunami hit his hometown, Ayacucho. He was also involved with the ASEAN Humanitarian Joint Task Force as the Senior Advisor in post Cyclone Nargis disaster relief operation.”

- Said Faisal

“Andy has been working with the AHA Centre for almost four years. He graduated from University of Applied Sciences in Karlsruhe, Germany majoring Master of Sciences in Geodesy. On his early career, he joined the Indonesian National Coordinating Agency for Surveying and Mapping (BSSN) as the DHL, PCK, Package team in Born, as well as becoming the Senior ICT Officer for French Red Cross Indonesia”

- Bachtar Andy Musaffa

“Ferny has an extensive working experience in the field of humanitarian works by joining Oxfam GB Regional Management Centre in Bangkok as the Regional ICT Officer. She was involved with several large-scale disasters in the region such as Indian Ocean Tsunami, Nias earthquake (Indonesia) and Cyclone Nargis in Myanmar”

- Ferny Hapsari

“Malyn joined the AHA Centre in 2015, bringing her extensive experience and expertise in natural disasters counting to almost two decades. On a daily basis she constantly monitors the situation in the region and provides quick updates to the ASEAN Member States whenever disaster occurs. Previously she was working with Oxfam Philippines as the Senior Adviser on Disaster Risk Management as well as the Senior Geoclip / GIS Specialist for Oxfam, Ltd to name a few”

- Malyn Tumonong

“Janggam obtained his Master’s Degree in Civil and Environmental Engineering from University of Missouri Columbia, USA. Currently he is also doing his PhD on the same field at the same university through research funding. As he joined the AHA Centre at its early stage, he brought his experience working with several UN Agencies such as UNDP and UN-ESC. Moreover, he was also involved as the Research Specialist for Cambia Columbia, MO USA and ICOREST - NASA Columbia, MO USA.”

- Janggam Adityawarman

“Adi is one of the few who witnessed first hand the devastating impact of Typhoon “Haiyan” in the Philippines 2013. Since then he was also deployed to several countries in the region including Myanmar Floods and Typhoon “Koppu” (Philippines) in 2015. His previous working experience was with the Nusantara Earth Observation Network (NFO) as the Assessment and Application of Technology in Indonesia.”

- Adi Bishary
“Agustina or Rina for short has more than sufficient experience in the field of logistics both inside and outside of the AHA Centre. She has served in various disasters in the world including Cyclone Nargis as part of the WFP Myanmar team in Yangon and she was also involved in the humanitarian efforts led by WFP in Kabul, Afghanistan. She obtained her certification in Humanitarian Logistics from Fritz Institute – the Chartered Institute of Logistics and Transport, England – United Kingdom”

- Agustina Trunay

“Yoram is in charge for the deployment and distribution of the relief items coming from the AHA Centre at times of disaster. With experience on logistics and procurement mounting up to more than ten years, he spent his previous journey with some of the most renowned organisations such as CARE International, Oxfam GB and Save the Children”

- Yoram A. Lukas

“Santy has an extensive career track in the field of finance by working previously in numerous projects at Mercy Corps and USAID/BASICS/Project. Currently at the AHA Centre, he is trusted with supporting admin and financial matters of the information and communication technology project supported by the Government of Japan.”

- Santy Naibaho

“Andrew is passionate about organisational change and innovation. It drove him to create the very first AHA Centre’s Knowledge Repository and introduce Pro-Track – a progress tracking device, enabling the organisation to regularly monitor the progress within each division – to all of the staff. He graduated with his Bachelor’s Degree in Human Resource & Knowledge Management from the University of Indonesia”

- Andrew Mardanugraha

“Being the Programme Coordinator for the Disaster Emergency Logistics System for ASEAN (DELSA), Saroj oversees the implementation of the project. Having extensive background in both project management as well as diplomatic background, he brought his rich knowledge to the AHA Centre in 2015. He graduated from his Master’s Degree in Diplomacy and International Strategy from London School of Economics and Political Science (LSE) through Chevening Scholarship Programme funded by the UK Foreign and Commonwealth Office”

- Saroj Brisal

“Sovi, is the first person to greet us all when entering the AHA Centre’s premises. She makes sure that the office is running smoothly and has a conducive working environment. Her previous experience prior to joining the AHA Centre was working as the secretary for the Integrated Disaster Management Project of Japan International Cooperation Agency (JICA)”

- Rivatus Sovia

“Joining the AHA Centre in 2015, Grace is passionate about programme management. She obtained her Master’s degree in Diplomacy and International Security from the Indonesian Defence University. At the AHA Centre, she is trusted to become the Programme Assistant for the operationalisation of Disaster Emergency Logistics System for ASEAN (DELSA), which is funded by the Government of Japan”

- Grace Endina

“Ibu, as we call for in the office is one of the earliest staff to join the AHA Centre. As one of the members of Finance Division, she witnessed the journey of the AHA Centre from its early stage to present. As a seasoned finance officer she is trusted with the financial bookkeeping for contributions by the Government of Australia. Previously she was working for several projects such as BASICS/Project – Canadian International Development Agency (CIDA) and Caritas Indonesia”

- Dwi Nurlita

“Soyi, is the first person to greet us all when entering the AHA Centre’s premises. She makes sure that the office is running smoothly and has a conducive working environment. Her previous experience prior to joining the AHA Centre was working as the secretary for the Integrated Disaster Management Project of Japan International Cooperation Agency (JICA)”

- Meilany Susanto

“Grace is passionate about programme management. She obtained her Master’s degree in Diplomacy and International Strategy from London School of Economics and Political Science (LSE) through Chevening Scholarship Programme funded by the UK Foreign and Commonwealth Office”

- Saroj Brisal

“Joining the AHA Centre in 2015, Grace is passionate about programme management. She obtained her Master’s degree in Diplomacy and International Security from the Indonesian Defence University. At the AHA Centre, she is trusted to become the Programme Assistant for the operationalisation of Disaster Emergency Logistics System for ASEAN (DELSA), which is funded by the Government of Japan”

- Grace Endina

“Ibu, as we call for in the office is one of the earliest staff to join the AHA Centre. As one of the members of Finance Division, she witnessed the journey of the AHA Centre from its early stage to present. As a seasoned finance officer she is trusted with the financial bookkeeping for contributions by the Government of Australia. Previously she was working for several projects such as BASICS/Project – Canadian International Development Agency (CIDA) and Caritas Indonesia”

- Dwi Nurlita
