## Indonesia

- According to The National Disaster Management Organisation of Indonesia, [Badan Nasional Penanggulangan Bencana \(BNPB\)](#), flooding in several regencies and provinces in Sulawesi are due to continuous rain which were further intensified by the prevailing Madden Julian Oscillation in the area.
- The local government of North Konawe Regency, Southeast Sulawesi Province, Indonesia, has extended the flood emergency response status for another two (2) weeks, until 30 June 2019.
- North Konawe Regency, is one of the most affected areas for flooding in Sulawesi since the start of the month. At least six (6) sub-districts were affected; while four (4) villages are still reportedly isolated due to damaged bridges in Landiwo, Tambakua, Landawe, and Langgikima sub-districts. Furthermore, several evacuation were conducted by [BNPB](#) via helicopters due to inaccessibility to the affected areas.
- In response to this disaster, [BNPB](#) coordinated with and provided assistance on disaster emergency response to local governments of affected areas. In addition, [BNPB](#) also assisted the local disaster management organisation (BPBD) in creating reports and administrative operations post. [BNPB](#) also provided relief assistance to the victims, such as family kits, hygiene kits, baby kits, blankets, rain coats, vests, and mattresses.
- Currently, this disaster event is well within the response capacity of Indonesia.
- AHA Centre will monitor continuously and issue update should there be any significant development of the situation.
