DISCLAIMER

The AHA Centre was established in November 2011 by the
Association of Southeast Asian Nations (ASEAN) Member
States to facilitate cooperation and coordination among
Member States, relevant agencies of the United Nations
and international organisations in disaster management and
emergency response.

This update consists of significant natural disaster events
that occurred in ASEAN Member States – Brunei
Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia,
Myanmar, Philippines, Singapore, Thailand, and Viet Nam.
The disasters recorded include Drought, Flood, Earthquake,
Tsunami, Volcano, Wind, Landslide, and Storm.

The use of boundaries, geographic names, related
information, and potential considerations for response are
for reference only, not warranted to be error-free or implying
official endorsement from ASEAN Member States.

07 March 2020 | More details at:
<http://adinet.ahacentre.org/reports/view/1577>

05 Indonesia:

Flooding in Semarang City

07 March 2020 | More details at:
<http://adinet.ahacentre.org/reports/view/1574>

REGIONAL SUMMARY:

Scattered and isolated rain showers were reported across Indonesia, except Sumatra and Kalimantan islands; while hailstorm lasting for a few minutes was reported in northern Viet Nam, impacting lives, and resulting to damages to properties and livelihood.

HIGHLIGHT:

The National Disaster Management Organisation of Viet Nam, Viet Nam Disaster Management Authority ([VNDMA](#)) reported of a storm affecting several provinces in the north - Yen Bai, Ha Giang, Tuyen Quang, Lai Chau, Lao Cai, Cao Bang, and Son La. The storm also brought hail into some provinces lasting less than an hour. The hails are reported to be in huge amounts. In total, several thousand people were affected, with several thousand houses damaged. But the biggest impact is on agriculture, damaging several hectares of high-value crops. According to the a news source, the total value of damages to agriculture and properties is estimated to be around 15 billion VND or 667,000 USD.

HYDRO-METEO-CLIMATOLOGICAL:

The ASEAN Specialised Meteorological Centre ([ASMC](#)) reported the persistence of dry weather in the Mekong sub-region, with observed haze in northern and central Thailand, northern Lao PDR, Myanmar, and parts of Cambodia. Meanwhile, scattered and isolated rain showers were reported in Indonesia, and a hailstorm in northern Viet Nam provinces.

GEOPHYSICAL:

There were only four (4) earthquakes with magnitude 5.0 and above that occurred in Indonesia ([BMKG](#)) and the Philippines ([PHIVOLCS](#)). None of these earthquakes resulted to significant impact and damages. Meanwhile, three (3) volcanoes, all in Indonesia ([PVMBG](#)), are under monitoring.

OUTLOOK:

The ASEAN Specialised Meteorological Centre ([ASMC](#)) forecasts an increased chance of wet conditions in southern Sulawesi and parts of Java Island in Indonesia. Meanwhile, drier conditions for northern Sumatra (Indonesia), Peninsular Malaysia, southern Thailand and the Philippines are forecasted to intensify. There is also a high likelihood that weekly temperature may exceed the 90th percentile.
