#### DISCLAIMER

The AHA Centre was established in November 2011 by the  
Association of Southeast Asian Nations (ASEAN) Member  
States to facilitate cooperation and coordination among  
Member States, relevant agencies of the United Nations  
and international organisations in disaster management and  
emergency response.

This update consists of significant natural disaster events  
that occurred in ASEAN Member States – Brunei  
Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia,  
Myanmar, Philippines, Singapore, Thailand, and Viet Nam.  
The disasters recorded include Drought, Flood, Earthquake,  
Tsunami, Volcano, Wind, Landslide, and Storm.

The use of boundaries, geographic names, related  
information, and potential considerations for response are  
for references, not warranted to be error-free or implying  
official endorsement from ASEAN Member States.

## REGIONAL SUMMARY:

A total of 26 disasters (7 floods, 3 landslides, 4 storms and 12 winds-related) affected the region in week 18. These disasters occurred in Cambodia, Indonesia, and the Philippines. The National Committee for Disaster Management (NCDM) reported that strong winds and storms occurred in Bântéay Méanchey, Kampong Speu, Kampong Cham, Kratie, Oddar Meanchey, Koh Kong, Kampong Chhnang, Kandal, and Svay Rieng Province, Cambodia. High intensity rain caused floods and landslides in West Java, North Sumatra, North Kalimantan, and Aceh Province in Indonesia as reported by Badan Nasional Penanggulangan Bencana (BNPB). The National Disaster Risk Reduction and Management Council (NDRRMC) reported a tornado accident to have occurred in Iloilo City, Iloilo (Region VI). On 07 May 2021, moderate to heavy rains and strong winds caused by the Inter-Tropical Convergence Zone (ITCZ) were experienced in South Cotabato, Cotabato and Sultan Kudarat Province as reported by NDRRMC.

## HIGHLIGHT:

Severe weather, including strong wind and thunderstorms, has been affecting 9 provinces in Cambodia since 6 May that have resulted in 10 injuries, more than 8K affected people, and around 1.6K damaged houses as reported by NCDM. According to Badan Nasional Penanggulangan Bencana (BNPB), heavy rainfall and the overflowing of Cileungsi and Cikeas river since 6 May, caused floods and landslides in Bekasi City and Bogor Regency, West Java which affected more than 12K persons, damaging more than 3K houses, 4 schools and 6 worship places. Meanwhile, high intensity rain in unstable soil conditions caused floods and landslides Labuhan Batu Utara Regency, North Sumatra which affected 3K persons, damaging 700 houses, and 1 road.

## HYDRO-METEO-CLIMATOLOGICAL:

For the past week, data from the ASEAN Specialised Meteorological Centre (ASMC) showed high 7-day average rainfall spreading mostly in West Papua, Banda Sea, South Sulawesi, western and eastern parts of Borneo, western part of Peninsular and islands in the western parts of Sumatra. As of reporting, no tropical cyclone advisory has been issued by the JTWC.

## GEOPHYSICAL:

Five (5) significant earthquakes (M≥5.0) were recorded in the region by Indonesia's Badan Meteorologi Klimatologi dan Geofisika (BMKG) and the Philippine Institute of Volcanology and Seismology (PHIVOLCS). Mount Sinabung, (alert level III) in Indonesia and Taal Volcano in the Philippines (alert level 2) reported recent volcanic activity and are under close monitoring. Volcanic activity was also reported for Mount Dukono and Semeru in Indonesia and Kanlaon in the Philippines according to PVMBG and PHIVOLCS.

## OUTLOOK:

For the coming week, according to ASMC, wetter conditions are expected northern Sumatra and Peninsular Malaysia; drier conditions are expected over much of the southern parts of the Maritime Continent; cooler conditions are expected over parts of the western and central Maritime Continent.
