# FLOODING AND LANDSLIDE IN SOUTH SULAWESI INDONESIA FLASH UPDATE #1

## INDONESIA

- According to the report from Indonesia's Badan Nasional Penanggulangan Bencana (BNPB), the flooding and rain-induced landslides triggered by high intensity rain on 28 August have affected North Luwu, Wajo, Soppeng, and Bone Regency, South Sulawesi.
- According to the [BNPB](#), a total of 14,175 families or 62,860 persons have reportedly been affected with the following details:
  - North Luwu Regency: 1,178 families/5,565 persons affected
  - Wajo Regency: 6,635 families/22,130 persons affected
  - Soppeng Regency: 6,062 families/33,665 persons affected
  - Bone Regency: 300 families/1,500 persons affected
- As of 30 August at 0700 HRS UTC+7, 12,763 houses, 12 bridges, 8 roads, 29 schools, 4 health facilities, 40 places of worship, and 11 other public facilities were affected and rain-induced landslides.
- According to the report flood waters ranging from a depth of 10 to 200 cm:

Regency	Min Flood Depth (cm)	Max Flood Depth (cm)
North Luwu Regency	10	70
Wajo Regency	50	170
Soppeng Regency	50	100
Bone Regency	30	200

- Flood warning has been issued for South Sulawesi Province for 31 August – 1 September based on [BMKG's impact based forecast](#).
- Based on [InaRISK](#), twenty three (23) regencies in South Sulawesi Province are identified as moderate – high prone for flooding and landslide including North Luwu, Wajo, Soppeng, and Bone Regency.
- The AHA Centre will continue to monitor for further developments and issue necessary updates
