

CALL FOR SUBMISSION
ASEAN RISK MONITOR AND DISASTER MANAGEMENT REVIEW (ARMOR)
ISSN: 2807-2421
4th EDITION

1. The AHA Centre is calling for aspiring experts, researchers, practitioners, policy-makers and entrepreneurs of ASEAN Member States, and those working in the ASEAN region to contribute article(s) for the 4th edition of ASEAN Risk Monitor and Disaster Management Review (ARMOR). For this edition, ARMOR will take focus on Sustainable Resilience. With the rapidly increasing level of risk of disasters exacerbated by the effects of climate change, the discussions are now focus on the efforts and urgent actions required to ensure that resilience is sustainable.
2. The Global Platform on Disaster Risk Reduction (GPDRR) 2022 in Indonesia highlighted Sustainable Resilience as the agenda and focused the discussions on promoting collaboration and contribution from different stakeholders to accelerate the achievement of sustainable resilience through the lens of strengthened risk-reduction culture and education; investment in science, technology and innovation; climate and disaster-resilient infrastructure; and implementation of global commitments. These efforts are in line with the visions of the Sendai Framework on Disaster Risk Reduction (SFDRR) 2015-2030 and the Sustainable Development Goals (SDGs). The ARMOR 4th Edition will feature articles highlighting discussions related to lessons learned, gaps, recommendations, innovations, and efforts of the ASEAN region to achieve sustainable resilience.
3. All chapters will go through peer-review process by the ARMOR 4th Edition Board of Reviewers and Board of Editors. Interested parties are expected to send their Expression of Interest, consisting of the following information: proposed chapter title, 300 words of abstract, and 50 words of prospective author(s) profile. Expression of Interest should reach ARMOR Board of Editors by **Friday, 31 March 2023** by email to sadhu.janottama@ahacentre.org with cc to caroline.widagdo@ahacentre.org. Interested parties are encouraged to refer to the Theme for ARMOR 4th Edition and Authors' Guidelines.
4. The ARMOR 4th Edition is scheduled to be officially published during the AHA Centre's 12th Anniversary in November 2023. ARMOR is a good venue for showcasing near-to-completion research projects, good practices and policy innovations in disaster management of ASEAN Member States or in ASEAN region.
5. For submission and further info, you may contact the following officers:
 - Sadhu Zukhruf Janottama
Disaster Monitoring and Analysis Officer
Email: sadhu.janottama@ahacentre.org
 - Caroline Widagdo
Knowledge and Change Management Officer
caroline.widagdo@ahacentre.org

THEME FOR ARMOR 4TH EDITION

1. The ARMOR 4th Edition will look at how the ASEAN Member States, the AHA Centre, humanitarian actors, and other relevant stakeholders play their roles in disaster management with the goal to achieve Sustainable Resilience in the ASEAN region. The provisional theme for ARMOR 4th Edition will be ***“Rendering 2023 Disastergram¹: Is ASEAN going to the right path for Sustainable Resilience?”***.
2. To answer that question, the AHA Centre has prepared the key highlights that can help authors in developing the articles:
 - 1) **Disaster risk in the ASEAN Region, by taking into account the component of Sustainable Resilience of the ASEAN Member States** – The articles may look at the risk calculation/profile taking into account vulnerability, multi-hazard exposure, coping capacities, and disaster management capabilities in ASEAN region which have incorporated sustainable resilience components.
 - 2) **How different stakeholders could contribute to the achievement of the ASEAN Member States moving closer to Sustainable Resilience, specifically in the context of disaster management?** – This question can be approached by looking at different layers and dimensions of stakeholders including the people at risk. The articles can touch on the realm of implementation of existing policies, best practices, gaps, inclusivity, and collaborative efforts by the government and/or different relevant stakeholders.
 - 3) **How might scientific, technological, and social innovation accelerate the achievement of Sustainable Resilience, specifically in the context of disaster management?** – The articles can specifically answer/provide solutions of how the ASEAN region could use science, technology, and social innovations to achieve Sustainable Resilience. The articles may look at several perspectives such as early warning systems, disaster prevention and mitigation, disaster preparedness, early action and anticipatory efforts, and resilient recovery, among others. The solutions could be existing or potential applications of innovation from various sources, including government agencies, humanitarian actors, disaster management community, academia, experts and researchers, and the private sector.

¹ ‘Disastergram’ derives from the word ‘Disaster’ and ‘Diagram’ which provide a holistic illustration of disaster setting in the ASEAN region including the level of risk, disaster management efforts, and disaster management-related research, innovation, and latest technology.

ONE ASEAN
ONE RESPONSE

AUTHORS GUIDELINE

1. Chapter can be written in forms of conceptual/theoretical paper or case studies (reports on implementation) or policy paper.
2. The target audience for this publication includes policy makers on ASEAN disaster management field, policy makers of ASEAN Member States, disaster management experts, academics / scholars and other advance readers on disaster management. The author should also bear in mind that the chapter could also be of interest to the general public.
3. The first page should contain title of chapter and name(s), institutional affiliation, correspondence address, contact number, emails of all author(s) and abstract of the chapter.
4. Abstract of the chapter should not exceed 300 words and contain the following details:
 - Name and contact information of the author(s), including institutional affiliation and email address.
 - A brief introduction and background to the topic
 - Results or reports on implementation
 - Conclusions and implications for future policy and practice
5. Recommended length of chapter: 4,000 – 5,000 words, for all types of chapters (conceptual/theoretical paper, case studies or policy paper), not including references.
6. The chapter should minimally cover the following aspects of the chapter topic discussed:
 - Introduction to the topic, and relevant policy/practical history on the topic in ASEAN.
 - Chapter objectives.
 - Research questions and analytical methods, if applicable.
 - Brief literature review, if applicable.
 - Good balance on discussion / description between relevance/implementation of the topic in ASEAN member states, ASEAN regional-context and relevance with international discourse.
 - Ensure use of credible and quality data for discussing the chapter topic, if applicable provides access to the raw data / ensure readers will be able to do cross-referencing.
 - Conclusions, policy and practical implications.
7. Authors are to use simple or plain English to accommodate readers from non-English speaking countries or do not use English as their first or second language.
8. The chapter to be written using Helvetica, font size: 11 points, lines spacing: 1.5, page size: A4 (portrait), normal margins (1 inch or 2,54 cm), format: MS Word (doc or docx) or LaTeX.
9. Tables and figures should be placed within text and be numbered as Table 1, Figure 1, etc. Permission from respective parties should be secured in advanced for the usage of tables and/or figures that are not owned by the authors.
10. The ARMOR publication will follow the referencing and citation style of the Publication Manual of the American Psychological Association, 7th Edition (2020). Only references used in the text of chapter should be mentioned in the reference part at the end of chapter. For notes, it is recommended to place it as footnotes at the corresponding page.
11. Each author is to provide a 50-words profile including information of their current affiliation, experiences/expertise on ASEAN disaster management and/or academic credentials.
12. Authors can contact the ARMOR contact persons for more information or clarification.
